

ENVIRONMENTAL POLICY

Farrans Construction are Building and Civil Engineering contractors, wholly owned by Northstone (NI) Limited, and part of CRH plc, undertaking work in the United Kingdom and Republic of Ireland.

We recognise that our construction activities may have a significant impact on the environment and that practical concern for the environment is an integral and fundamental part of our business and that of our clients.

We are committed to promoting continual improvement of our environmental performance, protection of the environment including prevention of pollution through the design and construction of our projects. We aim to operate our business in an environmentally sustainable manner. We endeavour to achieve this through the development and implementation of an environmental management system, in accordance with the requirements of the International Environmental Management Standard ISO 14001 through which we set, review and implement timetabled environmental objectives and targets. These objectives and targets are available on request.

The Company will aim to ensure that, where practicable, materials purchased will have a recycled content and have a minimal negative impact on the environment. We will endeavour to influence our major suppliers to minimise the negative impact of their operations on the environment.

We seek to comply with pertinent environmental legislation and regulations concerning our activities whilst delivering quality projects efficiently, cost effectively and with minimum disruption to the environment. Best Available Techniques (BAT) will be employed where construction works can affect the environment. These decisions are based on professional advice and close liaison with relevant authorities and agencies to minimise adverse environmental impact.

Our environmental policy is communicated to our employees, and available to the public on request.

J. Wilson

Managing Director
